

Experts in Adult Healthcare—Caring for the Whole Patient, for Life

NEW PATIENTS WELCOME

Internists are specially-trained physicians who care for the whole patient, focusing on prevention, diagnosis and treatment of common and complex adult diseases. IMA cares for patients from their teen years through retirement and beyond. We help our patients gain an understanding of general wellness, women's health, men's health, as well as provide effective treatment of many ailments. Internists manage patients' overall health and well-being, even when other specialists are involved.
